

Organizational Description

Tanzania Engineering and Manufacturing Design Organization (TEMDO) is an applied Engineering Research and Development institution established through Parliament Act No. 23 of 1980 which became operational in July 1982. TEMDO operates under the Ministry of Industry and Trade (MI&T). TEMDO is based at Njiro Hills in the City of Arusha.

VISSION

To be best developer and provider of quality and competitive plants, equipment and technical services in the region (East and Central Africa)

MISSION

To research, develop and transfer plants and equipment for commercial manufacturing and deliver competitive R&D services to the industrial sector

CORE VALUES

In fulfilling the stated mission, TEMDO is guided by the following core values:

- Being demand driven in its design, technology development, technical support and training services;

- Operating with the highest quality standards and professionalism;
- Operating in business-like manner to ensure timely delivery of products and services to customers and promoting commercialization of proven technologies.
- To promote technologies and offer services with a concern for the environment

CORE COMPETENCES

The core competence areas of TEMDO include:

- Design and Development of machinery, equipment and mechanical engineering products and systems for local commercial manufacture and applications
- Provision of mechanical engineering, technical support services like contract design and manufacturing of engineering systems, tools, jigs, fixtures and spare parts
- Preparation and production of engineering drawings
- Upgrading of skills of technical personnel from industry through tailor made training programmers.
